JERRILL VANDEVENTER, ASST. SUPT.
HAROLD SCHIPP, CURRICULUM DIR.

March 16, 2006

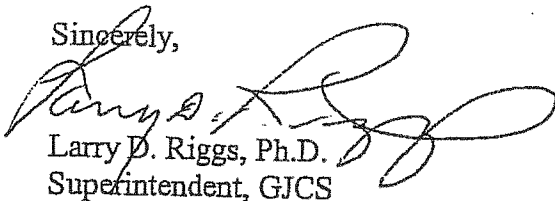

To Whom it may concern,

It is a pleasure for me to write a letter of recommendation for Krempp Construction. I have worked with them on three projects and found them to be very professional. The Krempp's were especially helpful with various difficult situations associated with the Greater Jasper Consolidated Schools building projects.

The Board employed Krempp Construction after much discussion with construction management companies and several clerk of the works. Krempp has an excellent background in the construction field. In the final selection process Krempp Construction, which is one of Jasper's largest, most successful builders had the lowest bid in most areas. On the most recent project, which was the building of a new middle school and renovation and additions to the high school Krempp did an excellent job. I'm convinced that we have the best quality of workmanship of any school in the state. The Krempp brothers will oversee the project and they will accept only excellent workmanship and materials.

I think it's rare to find a company with leadership well versed with construction knowledge; design experience; building code knowledge and have the willingness to meet their needs as a construction company and yet fulfill the buyer desires. Krempp Construction did a great job in Jasper and I would give them my highest recommendation.

Sincerely,

Larry D. Riggs, Ph.D.
Superintendent, GJCS
