Krempp Lumber Co.
224 1/2 Main Street
Jasper, Indiana 47546

To whom it may concern,

This company contracted with Krempp Lumber Co. to build a 60,000 square foot industrial building, which was completed in July of 1999. It was our opinion that the building was completed promptly, and with a minimum of fuss. It is an attractive, quality building, that is regularly admired by our customers and other visitors.

During the next two years, we asked Krempp to convert unfinished areas into completed office space. This work, too, was done promptly and with a minimum of mess and fuss.

Because of the good result we experienced with the original construction and the office expansions, we elected to have Krempp Lumber take responsibility for a 20,000 square foot addition that was completed in August of this year. Krempp paid particular attention to making the addition blend with the original building both on the inside as well as the outside, and it is difficult to tell where the original building leaves off and the addition begins.

I would also like to note that Krempp waived the opportunity to charge additional funds for minor building changes that were requested by Integrated Systems on both expansions, most notably on the original building. We approved these changes with the full understanding that we would be charged, based upon ballpark cost estimates, and we were most pleasantly surprised when Bill Krempp informed us at the end of the project, that he was waiving all such additional charges. Some minor changes were waived on the building addition, as well. Such honesty and integrity, I have to believe, is unusual in the building industry and it is for this reason, along with the quality of the construction, that I highly recommend Krempp Lumber for your building project.

We are very pleased with the cooperation we received from Krempp Lumber all projects, and we would not hesitate to ask Krempp to address future expansions. If you would like to hear more about our experience, you may call me directly.

Sincerely,

Scott Larsen
President
