TREASURER

October 25, 2010

To Whom It May Concern:

In 2008 and 2009, Krempp Construction, Jasper, Indiana, was the General Contractor on a \$12,000,000 addition to Paoli Junior-Senior High School. Said addition included the following:

- a) a 1,000 seat auxiliary gymnasium with a balcony walking track, two dressing rooms with coaches' offices, and two storage rooms;
- b) an 800 seat state-of-the art performing arts center (auditorium) with an orchestra pit, full fly loft, dressing room, prop/costume storage room, prop construction area, and two rest rooms;
- c) a vestibule between the auxiliary gymnasium and auditorium with concessions area, ticket booth, coat storage room, and two restrooms;
- d) a 3,325 sq. ft. wrestling practice room with padded walls;
- e) a 2,250 sq ft. physical fitness center;
- f) three classrooms with two hallway rest rooms;
- g) four storage rooms, a trophy/conference room; and an elevator.

The workmanship on the above-described project was excellent. The workers from the various trades were very professional, meticulous, and took great pride in their craftsmanship.

The Project Superintendent had years of experience, was extremely knowledgeable, was highly skilled in coordinating the work of various subcontractors, spent an enormous amount of his time personally supervising the construction and making sure it was of the highest quality and in accordance with the specifications, was pro-active in preventing problems, and was prompt in solving problems and correcting mistakes that occurred. He was also very personable and highly respected by all of the sub-contractors and their workers.

Bill Krempp, the Project Manager, took great pride in his company's performance. He did a superb job of ensuring that materials needed for the construction project were on-site in a timely manner.

Mr. Krempp exhibited extra-ordinary organizational skills. A detailed agenda was prepared for and used at every progress meeting. Said meetings were conducted in a professional manner and sub-contractors were required to present detailed written progress reports. If questions or problems arose during progress meetings, Mr. Krempp always had answers to the questions and was able to solve the problems in an amicable manner. As a result of Mr. Krempp's administrative and personal relations skills, the project was completed on schedule.

As you can tell from the above, I was extremely pleased with the services and work of Krempp Construction. Said firm is the embodiment of the term "professionalism."

Krempp Construction's employees are dedicated, conscientious, extremely knowledgeable, skilled, and take great pride in constructing a high quality building that meets, and in many instances exceeds, the specifications. Not only does Krempp Construction complete projects on schedule, there expertise, supervisory skills, and workmanship is unsurpassed.

I give Krempp Construction the highest possible recommendation and would urge you use them as the General Contractor on your next construction project if possible. You will be extremely satisfied with their work.

Respectfully,

A handwritten signature in cursive script that reads "Alva L. Sibbitt, Jr.".

Alva L. Sibbitt, Jr., Ed.D.
