

*Saint Meinrad*

Archabbey

Physical Facilities Office

April 10, 2006

To whom it may concern:

Krempp Construction has had a working relationship with Saint Meinrad Archabbey for many years. Our most recent construction project was our Saint Meinrad Guest House and Retreat Center. Krempp served as the General Contractor of this six million dollar project. The administration of Krempp Construction, the project manager Bill Krempp and field superintendent Myron Lasher never missed a heart beat. From start to finish building materials, coordination of sub-contractors and quality of workmanship was viewed throughout the project as priority one. The announcement of the dedication came very early in the project. Every contractor affiliated with Guest House project knew of the pending date. Krempp made sure the project came in on time with out delays or most importantly additional cost being accrued.

As our future projects come on line Krempp Construction will have the opportunity to compete for these. Our building projects are usually given out as invitation only bid process. Being a private facility we are able to choose who shall have these opportunities to perform work for us. If further assistance is needed I have enclosed my business card. Please do not hesitate to make contact with me.

Sincerely,

Pat Clark  
Physical Facilities Director
