To Whom It May Concern:

The Krempp Construction, Inc of Jasper, Indiana has completed several projects for Vincennes University, most recently our new Updike Hall building, as well as the Mining and Confined Space Training Center, located on our Gibson County Campus.

We have experienced a good working relationship with them over the years. They are professional, follow up with details, and always promptly responding to any situations that may arise.

We would recommend them as a General Contractor, as the work they have completed for us has been completed on time and within the scope of the conditions of the project.

Sincerely,

A handwritten signature in blue ink, appearing to read "Andrew Young", is positioned above the typed name.

Andrew Young, AIA LEED AP
Director of Architectural Services
