To whom it may concern:

In January 2021, the Thyen-Clark Cultural Center opened to much anticipated fanfare. The Cultural Center is a unique project that combines two government entities, Jasper Public Library and Jasper Community Arts into one facility. As with any government project, it meant there were additional regulations that were required to be followed during the design, bidding and construction process.

I am so very thankful Krempp Construction was the awarded General Contractor on this project. I had not had the opportunity to work with them previously but knew of their commitment to quality. After our first meeting, I knew right away they were the team meant to built this project. The Cultural Center is now the gateway to Jasper from the south. The 62,000 square foot complex shines as true testament to the craftsmanship and care placed into its construction. About half of this project was completed during the beginning of the Covid pandemic and their ability to be prepared and have supplies already ordered kept us from additional delays.

Without any hesitation, I would recommend Krempp Construction. They have a(n):

- Commitment to competitive pricing
- Unmatched communication
- Ability to meet established deadlines
- Desire to hire local subcontractors as much as possible.
- Unrivald history of quality craftsmanship

What impressed me most with Krempp Construction, and specifically Matt Krempp, is he provided us a quality building that will serve our community for generations to come, but he didn't stop there. Many times contractors will turn over the keys and be done with the project. Matt has continued to check in and helped with any issues, even though there have been very few, still to this date almost a year after the project was completed.

I will gladly be a reference for the entire Krempp Construction team and am so proud to have their name on the plaque as our General Contractor. We are fortunate to have such great partners located in Jasper, Indiana and know that no matter what the project may be, it will turn out as a great success.

Sincerely,

Christine Golden, Director

To Whom It May Concern:

I would highly recommend engaging with Matt Krempp and Krempp construction on construction projects both big and small. Having worked with them for several years on the multi-million-dollar Thyen-Clark Cultural Center project, I can attest to their professionalism and desire to not only meet expectations, but exceed them. The team at Krempp Construction never tired of answering questions and thoughtfully detailing each step of the construction process. Though their occurrence was rare, they even owned up to issues they ran into and did not gloss over difficulties or obstacles, which I found to be refreshingly honest.

Matt Krempp and the rest of the team were attentive to the needs of the project and the community. With a large amount of funding coming from tax-payers, Krempp Construction were aware of the pressures project leaders faced and understanding of particular hurdles or required changes that come with a government project. The support from Krempp did not end with the keys being handed over, either. Matt has been a reliable communicator and quick to respond to any questions or concerns I or my colleagues might have.

If given the opportunity to work with Matt and Krempp Construction again, I would not hesitate.

I would be happy to further discuss my experience with Matt Krempp and Krempp Construction at any time.

Sincerely,

Kyle Rupert, Executive Director

Jasper Community Arts
